

Here are Your Sample Jumpstarts!

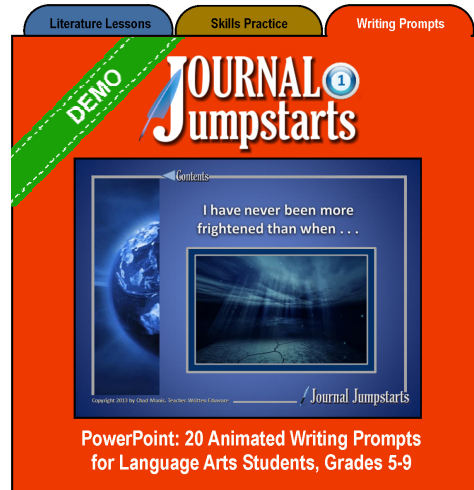

...and, thanks for your interest in this product!

Important Information

This sample PowerPoint presentation contains 3 of the Journal Jumpstarts activities from Volume 1.

The full, [registered version](#) comes with the all 20 activities, along with the clickable Table of Contents.

To get Started

1. Create a folder on your device and name it, "Jumpstarts1."
2. Download the free, [sample version](#) and unzip the files into your Jumpstarts 1 folder. If you don't have an unzip utility, I recommend the free one I use called [7-Zip](#).
3. Launch the PowerPoint presentation.

Important Notes

- The PowerPoint presentation and the animations it calls MUST remain in the same folder together. If they are not, the animations will not work.
- The animation on the left side of the screen should start automatically. If it does not, click once on it to set it into motion.
- The large, central animation on each activity slide does NOT start automatically. Click once on it to set it into motion.

Thanks Again

I truly appreciate your taking the time to download this resource. If you like what you see, the full, [registered version](#) containing all 20 jumpstarts is just a click away. Best wishes always and thanks for all you do for our kids!
