

# Here's Your Access Link!

*And, Thanks for your Interest in this Product*

## Free Demo Information

This free, watermarked demo of *Tablet Tutor* is complete and fully-functional. Its purpose is to illustrate the functionality and scope of its content.

The [full, registered version](#) is exactly like this demo version; however, all of those annoying "Free Demo" watermarks have been entirely removed.

## Accessing Tablet Tutor

*on PC's, Macs, Laptops, MacBooks, Chromebooks*

*Tablet Tutor* will run on all of the most widely-used browsers, including Internet Explorer, Firefox, Google Chrome, and Safari. To open *Tablet Tutor*, simply copy and paste <http://tinyurl.com/pvewmkb> into your preferred browser's URL address bar.

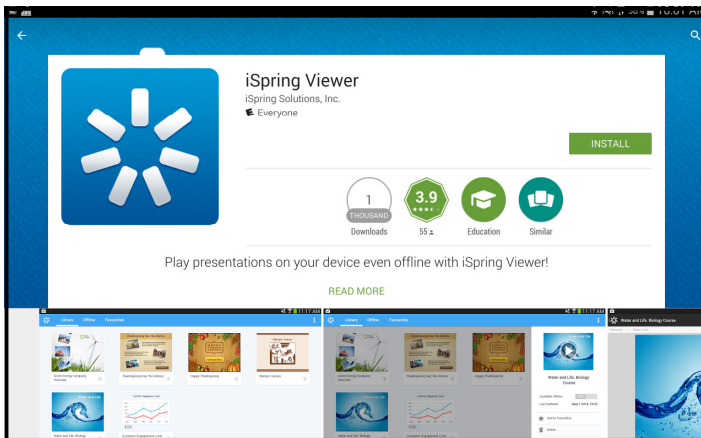

## Accessing Tablet Tutor on Android Tablets and iPads

To run *Tablet Tutor* on tablets, please complete the following 5-step procedure. It's really quite easy, and these steps only have to be taken once:

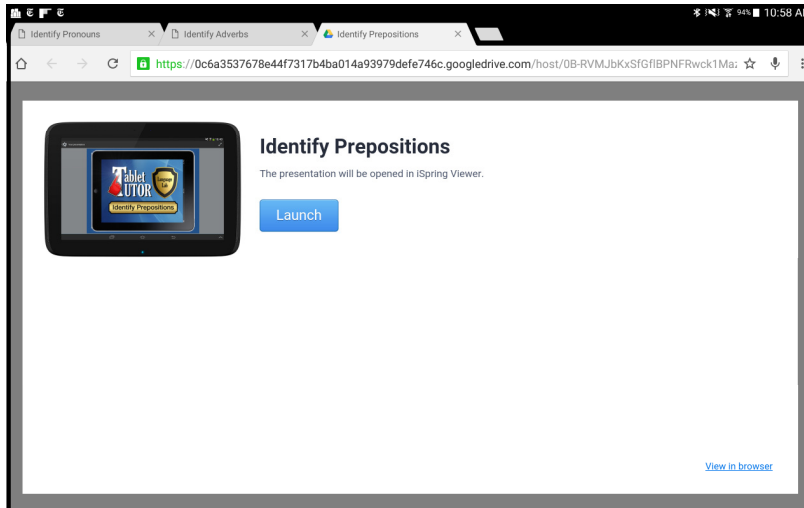

1. If Chrome is not installed on the target device, a free download is required from either iTunes (for iPads) or [Google Play Store](#) (for Android).
2. Copy and paste <http://tinyurl.com/pvewmkb> into Chrome's URL address bar.

You will be automatically linked and prompted to install the free iSpring Viewer:

3. Install the iSpring Viewer.

4. Follow the Tablet Tutor link, <http://tinyurl.com/pvewmkb> from the Chrome web browser, and you will be presented with a screen displaying the school you have chosen (a sample of which is shown here):

***Tap the “Launch” button, and that’s it. You’re done!***

## **Upgrading to the Full Version**

If you and/or your kids like what you see in this demo version, I’d be delighted for this to become a permanent part of your classroom resources library.

The [full, registered version](#) is exactly like this Demo version, but as mentioned before, all of those annoying “Free Demo” watermarks have been entirely removed.

In closing, I appreciate your interest in this product, and thanks for all you do for kids!
